PNEUMATIC BRAKE AND
SUSPENSION SYSTEMS
FOR TRAILERS AND
SEMITRAILERS

A **SAFER** FUTURE

BREX
PNEUMATIC BRAKE SYSTEMS

Brex was founded in 2005 and is located in the city of Rio de Janeiro. It is the South American Company leader in the production of pneumatic components for the brake and suspension systems for commercial heavy-duty vehicles, such as trailers and semitrailers. Our engineering is equipped with high-tech softwares for product development and also state-of-the-art eletronic tests in the production line.

SPECIALIZED TECHNICAL ASSISTANCE

FAST DELIVERY

EFFICIENT AFTER SALES

IATF 16949:2016
Quality Management System
CERTIFICATE

All of our products are carefully inspected and tested, meeting the **strict requirements of both Brazilian and European ECE 13 Automotive standards.**

HEIGHT ADJUST VALVE| *PG 17*
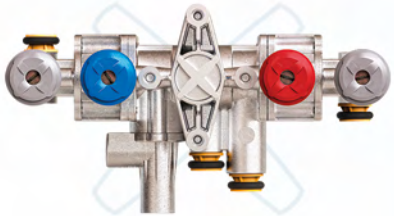

DOUBLE 3/2 WAY VALVE | *PG 18*

LEVELLING VALVE (WITH STOPPING STROKE) | *PG 17*

EMERGENCY AND SERVICE MANUAL COUPLING HEAD | **PG 21**

...THAT YOU DIDN'T EVEN NOTICE **IT WAS HERE!**

Supplier in 4 of the top 5 OEM in Latin America, choosing Brex you will have a solid partnership counting with more than 20 years of experience in this market.

Brex produces components that are carefully tested and inspected before the factory shipment, ensuring efficiency and durability of the products, providing fast delivery and a good after sales attendance.

SOUTH AMERICAN MARKET **LEADER**

GLOSSARY

PRESSURE PROTECTION VALVE

It is used in the protection of the airbags when the vehicle is equipped with pneumatic suspension.

TWO WAY VALVE

It is the anti-compound system of the braking modes, which is the double activation by the brake pedal and/or parking.

SPRING-BRAKE PROTECTION VALVE

Prevents the involuntary application of the parking brake ("spring-brake") when the pressure is below 5 bar.

PARKING VALVE

It allows the implement to be safely uncoupled.

IN LINE FILTER WITH BY-PASS

Protects the pneumatic brake and suspension system.

COUPLING HEAD

Allows the supply of compressed air to the towed vehicle (red/emergency) and the brake control signal (yellow/service).

EMERGENCY VALVE

Automatically activates brake application in case of system depressurization.

SELECT LOW VALVE

It has the function of a 3rd mechanical modulator, applied to the steered axle.

LIFT AXLE VALVE (PUSH-PULL VALVE)

Raises the axles to save tires when the vehicle is unloaded.

LOCKING FUNCTION

It does not allow the axle braking when it is raised/out of roll.

PRESSURE REGULATOR VALVE

Regulates the pressure of the suspension airbags for vehicles with mixed suspension, or the pressure of the alignment airbags for self-steering axle.

LEVELING VALVE

Allows to keep the chassis height, regardless of load condition of the vehicle.

SHUNT/RELEASE VALVE

Used to move the vehicle without the need to pressurize the entire brake system.

SELF-STEERING AXLE CONTROL PANELS

It pneumatically sets up the self-steering axle.

MANIFOLD

Distribution of compressed air from 1 inlet in 2 or more outlets.

QUICK RELEASE

Quick release of the compressed air from the brake chambers.

RELAY VALVE

Braking modulation according to the signal received from the pedal/driver, it also decreases the response time in long/combined vehicles.
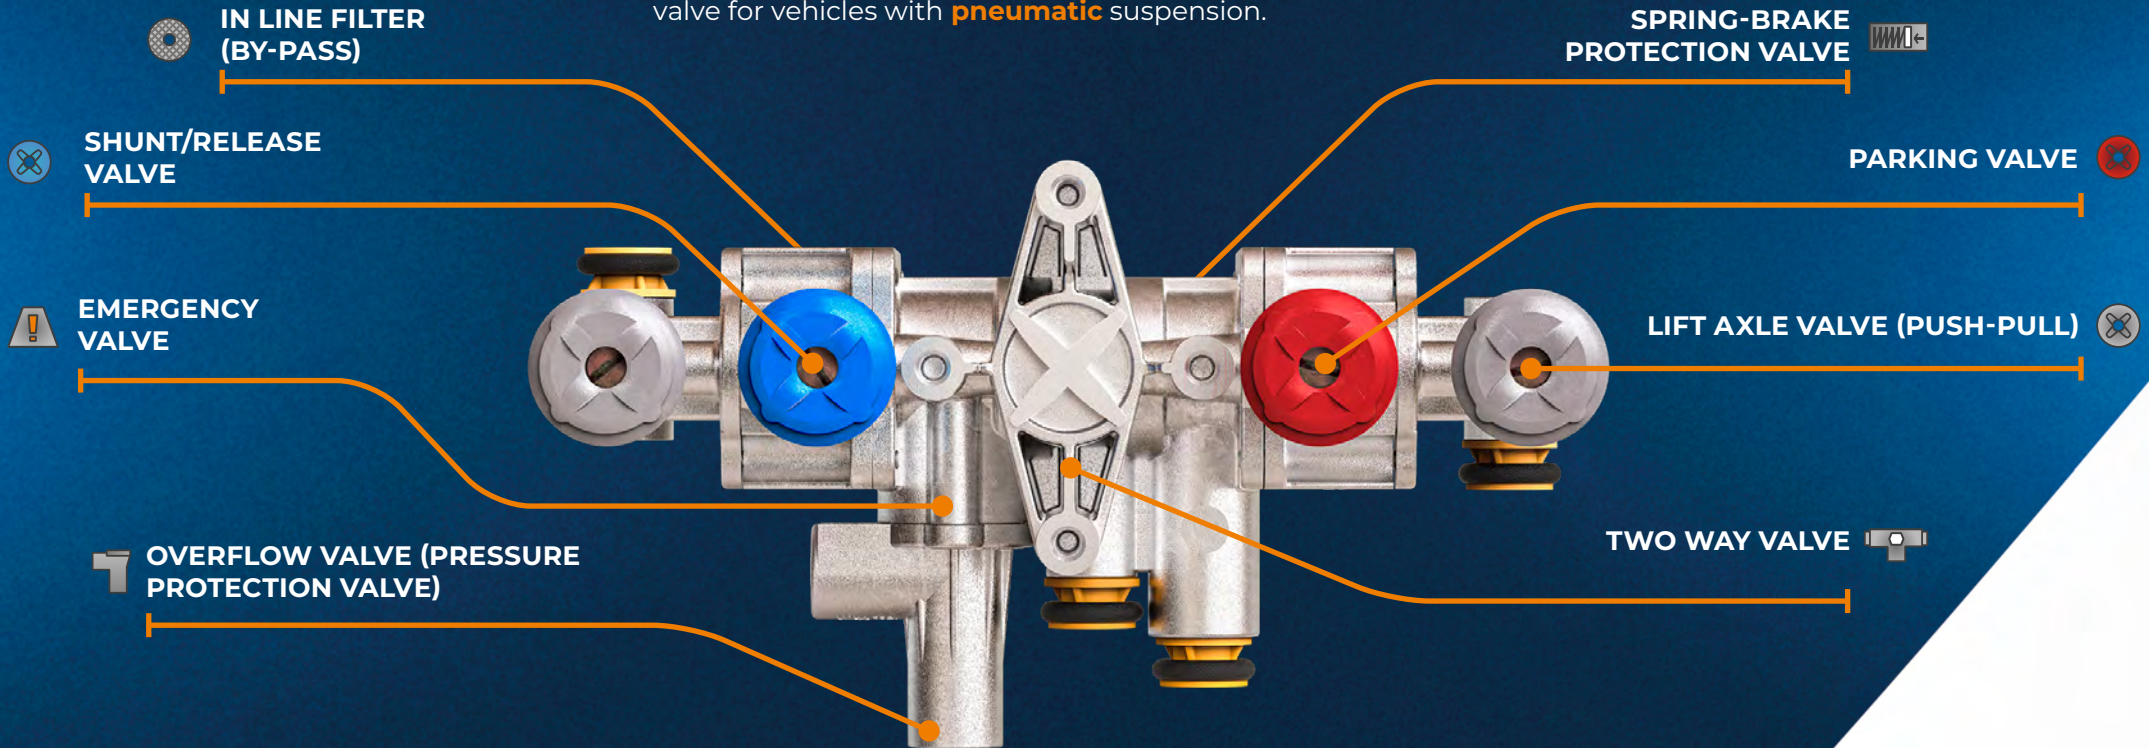

3/2 NC SOLENOID PILOT (ELETRICAL 3/2 WAY VALVE)

3/2 way normally closed electrically operated valve, used in the control of the self-steered axle.

6TH GENERATION MULTIFUNCTION PANEL

Developed to be highly versatile, the 6th Generation Multifunction Panels are the only products on the market that group functions together, besides the mandatory ones, such as: valves for **lift** axle and **pressure protection** valve for vehicles with **pneumatic** suspension.

IN LINE FILTER (BY-PASS)

TWO WAY VALVE

EASY SETUP AND REPLACEMENT

ORIGINAL PRODUCT:
FACCHINI LIBRELATO
RANDON NOMA
GUERRA AND OTHERS

Fixed directly on the vehicle **chassis**...

Or with the **bracket**!

PUSH/PULL VALVE

OBSERVATION:
This valve is part of the 6G Panel.
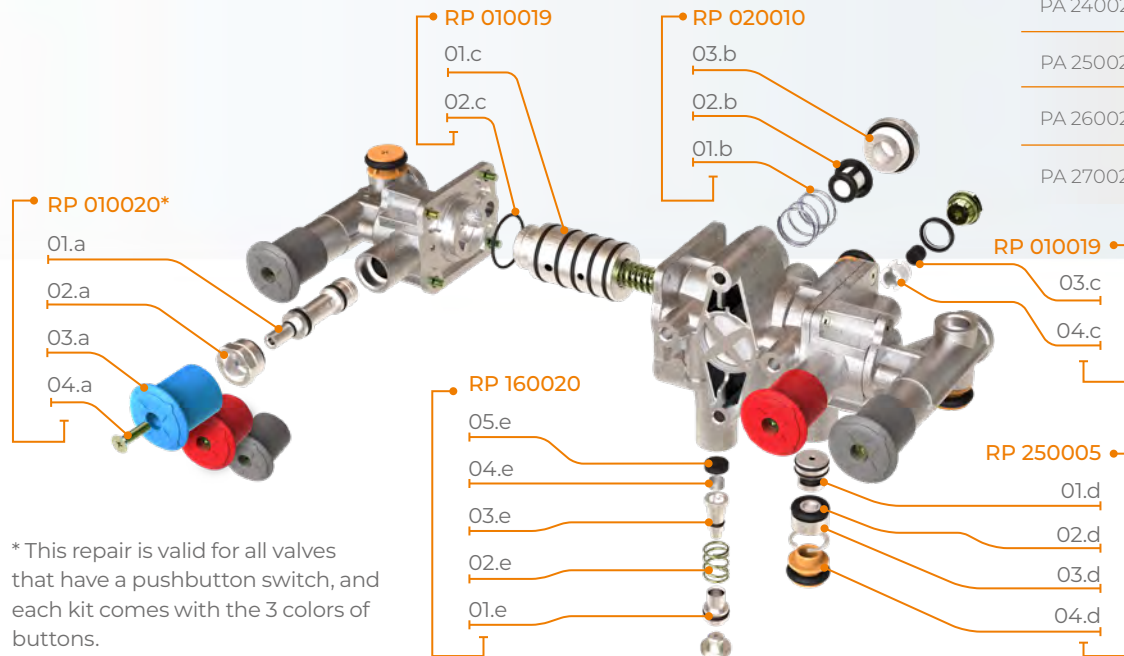

CODE:
PA190020

THREADS:
M16 x 1,5mm

REPAIR: RP010020

FUNCTIONS:
Lift Axle Valve (Push-Pull)

ALL-COMPATIBLE

All of the main functions of the trailer brake system were brought together in a single product, with only one source of supply and without the **need of auxiliary installations**. This was developed to custom the project of pneumatic solutions and to keep the 'set up' even easier and more reliable. It can be installed in two ways: directly on the vehicle's chassis or via support (using the bracket), **with fixing and applications compatible** with the previous generations of Brex panels or with panels from other brands available in the market.

* This repair is valid for all valves that have a pushbutton switch, and each kit comes with the 3 colors of buttons.

The Brex 6G Panel has the advantage of a **"plug and play"** adaptability, it allows to replace from the oldest versions (4G or 5G) - or even a panel from another brand (competitor) – without new adaptations, no need for auxiliary connections or a pneumatic specialist. Just replace the old panel for the new Brex 6G Panel using the **same drilling** and hoses.

The repairs of the Brex 6G Panel are **easy to handle and to adapt,** they were developed to fix any panel component. That way, the maintenance is easily done and, after changing, the vehicle is ready to hit the road again.
